

**KLR ELEVATORS  
PRIVATE LIMITED**

# Why To Choose KLR ELEVATORS PVT.LTD??

## 1. Cutting-Edge Technology

KLR Elevators integrates the latest technology to ensure smooth, safe, and efficient elevator operations. Our systems are designed with advanced safety features and energy-efficient mechanisms.

## 2. Superior Quality & Reliability

We prioritize durability and performance, using only the best materials and components. Our elevators undergo rigorous testing to meet international safety and performance standards.

## 3. Customized Solutions

Every building has unique requirements, and KLR Elevators provides tailored solutions for residential, commercial, and industrial applications. We work closely with clients to design elevators that fit their specific needs.

## 4. Exceptional Customer Service

From installation to maintenance, our dedicated support team ensures seamless operation and quick response times. We offer 24/7 assistance to keep your elevators running smoothly.

## 5. Cost-Effective & Energy-Efficient

KLR Elevators offers budget-friendly solutions without compromising on quality. Our energy-efficient models help reduce operational costs and environmental impact.

## 6. Compliance & Safety Standards

We adhere to global safety regulations and industry best practices, ensuring maximum security and peace of mind for passengers.

## 7. Proven Track Record

With a history of successful projects and satisfied clients, KLR Elevators has earned a reputation for excellence in the industry.

For a reliable, efficient, and innovative elevator solution, KLR Elevators is the perfect choice!

## MONTANARI MOTORS

---

- Since its establishment in Italy in 1970, the company's growth has been stable and the significant investment in the creation of innovative products and in optimizing the enterprise technology has made Montanari Giulio & C a cutting edge company, with a well-recognized image, whose quality, service and reliability are recognized and appreciated in more than 80 countries.

We deal with the most reliable manufacturers from around the globe.

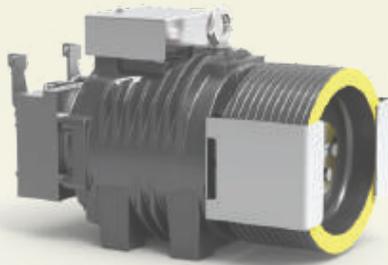

---

## SICOR MOTORS

- It was founded in 1981, set up and headquartered in Rovereto, the north-eastern Italian province of Trento. Sicor supplies a wide range of traditional gearboxes, as well as gearless motors for elevators, designed to provide safe, technically advanced solutions for any type of lifting platforms.
- Gearless Traction Machine can save up to 33% of energy

---

## BHARATH BIJILEE MOTORS

- Bharat Bijlee is a pioneer in electrical engineering in India and is one of the most trusted names in the industry today. Established in 1946, its primary business segments are transformers, electric motors, elevator systems and drives. The gearless motor can save energy up to 33% when compared to a gear motor.

# MOTORS

# SAFETY

- We provide MNC industry-standard safety features in elevators such as OSG, Terminal Safeties, UPS-based Ard, Main Contractor Protection & Parking.

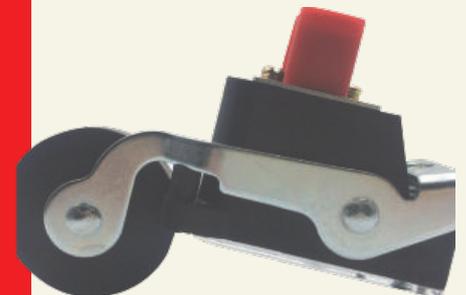

## OVER SPEED GOVERNOR:

- As the name suggests, it governs the speed by breaking the lift in case it ever exceeds its rated speed. Fail-safe devices like these ensure strict adherence to safety standards. An Over Speed Governor is an elevator device which acts as a stopping mechanism in case the elevator runs beyond its rated speed. This device must be installed in traction elevators.

## LIMIT SWITCH:

- The Limit Switch provided by Sneha is made of superior quality and will serve for a long duration. These switches cut the power supply in the elevator in case of any faults, hereby ensuring the safety of the people inside. Limit Switch is designed primarily for use in elevator.

## UPS:

- ARD (Automatic Rescue Devices) are the smart rescue devices that work on the principle of powering and operating the Elevator Controller at rated voltage to perform the rescue operation. The rescue device interfaces with the ES Drive which has a unique feature of low voltage DC operation to operate the elevator motor with low voltage battery. During main power on, it monitors the power and continuously charges the batteries. In the event of power failure, the rescue device will get activated within the predetermined response time and will run the motor in the upward direction at low speed and bring the elevator to the immediate next floor and open the doors automatically.

# Dear Customer

"We are truly grateful for the incredible generosity of time, energy, and support you have so selflessly given us. Your unwavering belief in our vision has not only been a source of inspiration but also a key driving force behind our growth and success. Each step we've taken toward reaching our goals has been made possible by the profound impact you've had on our journey.
